A SmartBridge Product

Date	01 October 2026	**Maximum Marks**	2 Marks
Team ID	SWTID-2026-5883	**Document Type**	Data Flow Diagram (DFD)
Project Name	**Pocket Smart AI: Your Smart Budget & Recommendation Assistant**		

Team Members & Task Assignment

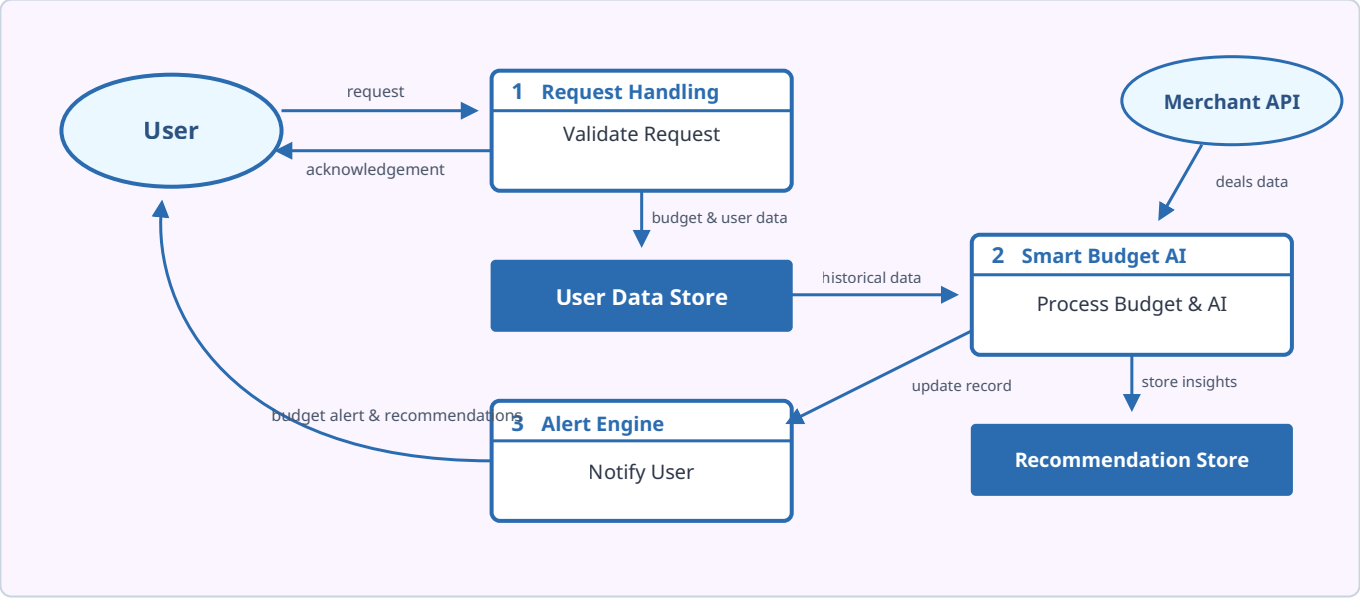
S.No	Student Name	Assigned DFD Component	Responsibilities & Scope
1	**Jashvini.K**	1.0 User Request & Auth Handling	Validate user credentials, handle budget input requests, income/expense logging, and initial request authorization.
2	**Indhumathi.D**	User Data Store & History	Manage secure data persistence, user budget profiles, historical transaction logs, and user preference storage.
3	**Jayapriya Rajkumar**	2.0 Smart Budget & AI Engine	Process spending data, generate smart category recommendations, calculate budget limits, and execute recommendation algorithms.
4	**Jonal.A**	3.0 Alert & Recommendation Engine	Generate budget threshold alerts, trigger real-time smart financial recommendations, and dispatch push notifications.
5	**Kavibharathi.K**	Recommendation Data Store	Store AI-generated financial insights, recommendation templates, savings rules, and analytics history.

Data Flow Diagram (DFD) Overview

Create a Data Flow Diagram (DFD) to show how data moves through your system — between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded	**External Entity**	A person, organization, or system outside the project that sends or receives data (e.g., User, Payment Gateway, Merchant API).

Symbol	Name	Description
Header Rectangle	**Process**	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Budget, Calculate Insights).
Solid Rectangle	**Data Store**	A place where data is held for later use (e.g., User Data Store, Recommendation Data Store, Expense Database).
→	**Data Flow**	The movement of data between entities, processes, and data stores, labeled with what data is being passed.


System Data Flow Diagram
