Coding & Solution

Date: 1 October 2026

Team ID: SWTID-2026-5883

Project Name: Pocket Smart AI: Your Smart Budget & Recommendation Assistant

Maximum Marks: 5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

• Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.

• The solution should address the core problem statement and implement the key functional requirements.

• Include all source files, configuration files, and setup instructions needed to run the application.

• Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[Paste your GitHub / GitLab or hosted link here]
Programming Language(s)	[Enter the programming language(s) used]
Framework(s) Used	[Enter the framework(s) used]
Key Features Implemented	• Smart budget tracking and expense management • AI-based budget/recommendation assistance<
Pending / Incomplete Features	[Enter any pending or incomplete features]
Setup / Run Instructions	[Enter installation, configuration, and run steps]

Team Work Assignment

Work is assigned according to the order of the team members' names provided.

S.No.	Team Member	Assigned Work
1	Jashvini.K	Project planning, requirements analysis, budget-management module, and overall documentation.
2	Indhumathi.D	UI/UX design, user interface development, dashboard screens, and user-flow implementation.
3	Jayapriya Rajkumar	AI recommendation module, recommendation logic, and personalization features.
4	Jonal.A	Backend development, database integration, expense/budget data handling, and API integration.
5	Kavibharathi.K	Testing, error handling, integration support, code-quality checks, and final project documentation.

Code Quality Checklist

S.No.	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	[ ] Yes [ ] No
2	Meaningful variable and function names are used	[ ] Yes [ ] No
3	Code includes comments / documentation where necessary	[ ] Yes [ ] No
4	Error handling is implemented for critical operations	[ ] Yes [ ] No
5	The application runs without critical errors	[ ] Yes [ ] No
6	Code is committed to a version control repository	[ ] Yes [ ] No
