PROBLEM–SOLUTION FIT CANVAS

Team ID: SWTID-2026-5883
Project Name: Pocket Smart AI: Your Smart Budget & Recommendation Assistant

TEAM WORK ALLOCATION

Member	Assigned Area	Work / Responsibility
1. Jashvini.K	Customer & Problem Research	Identify target users, their budgeting needs, major pain points, and problem frequency.
2. Indhumathi.D	Root Cause & Behavior Analysis	Study why users struggle with budgeting, spending habits, and the intensity of the problems.
3. Jayapriya Rajkumar	Existing Solutions & Channels	Analyze current budgeting/recommendation solutions, their pros and cons, and user access channels.
4. Jonal.A	Triggers & Emotions	Identify triggers that make users seek help, plus emotions before and after using a budgeting assistant.
5. Kavibharathi.K	Solution Design & Integration	Define Pocket Smart AI features, recommendations, solution flow, and how the solution addresses the identified problems.

PROBLEM–SOLUTION FIT CANVAS

1. CUSTOMER SEGMENT(S) [CS] College students, young adults, and first-time earners who want simple help managing daily spending and personal budgets.	**6. CUSTOMER LIMITATIONS [CL]** Limited income, irregular spending, lack of financial planning experience, limited time, and preference for simple mobile tools.
5. AVAILABLE SOLUTIONS – PROS & CONS [AS] Spreadsheets and manual notes: flexible but time-consuming. Generic budgeting apps: useful tracking but may feel complex. General recommendation platforms: convenient but not focused on personal budget limits.	**2. PROBLEMS / PAINS + FREQUENCY [PR]** Difficulty tracking expenses, overspending, uncertainty about affordable purchases, and trouble deciding where to cut spending. These can occur daily or whenever users make purchase decisions.
9. PROBLEM ROOT / CAUSE [RC] Lack of a simple personalized budgeting routine, fragmented expense information, impulse purchases, and limited awareness of spending patterns.	**7. BEHAVIOR + ITS INTENSITY [BE]** Users check balances, make quick purchase decisions, compare prices, and may postpone tracking expenses. Behavior becomes more intense when money is limited or expenses increase.
3. TRIGGERS TO ACT [TR] Running low on money, an unexpected expense, a planned purchase, monthly budgeting, or realizing that spending is higher than expected.	**10. YOUR SOLUTION [SL]** **Pocket Smart AI** is a smart budget and recommendation assistant that helps users record and understand expenses, set practical budgets, receive personalized purchase recommendations, and make spending decisions within their limits.
8. CHANNELS OF BEHAVIOR [CH] **ONLINE:** Mobile app, web interface, notifications, digital recommendations. **OFFLINE:** Everyday shopping decisions, college expenses, local purchases, and personal budgeting activities.	**4. EMOTIONS BEFORE / AFTER [EM]** **Before:** Confused, uncertain, worried about overspending. **After:** More informed, organized, confident, and aware of available budget.

Source format: the uploaded Problem–Solution Fit Canvas asks teams to address customer segments, limitations, available solutions, pains, root causes, behavior, triggers, emotions, channels, and the proposed solution.
