Date	01 October 2026	**Maximum Marks**	3 Marks
Team ID	SWTID-2026-5883	**Document Type**	Project Executable Files
Project Name	**Pocket Smart AI: Your Smart Budget & Recommendation Assistant**		

PROJECT EXECUTABLE FILES DOCUMENT

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Team Work Allocation & Module Ownership

S.No	Student Name	Assigned Module / File Responsibilities	Executable Deliverables
1	**Jashvini.K**	Frontend UI / Mobile Application & APK Build	Flutter Mobile App source code (`/src/frontend`), compiled Release APK (`/build/pocket_smart_ai.apk`), and UI assets.
2	**Indhumathi.D**	Backend REST API & AI Recommendation Engine	FastAPI backend server code (`/src/backend`), ML recommendation module (`recommendation_engine.py`), and API specs (`openapi.json`).
3	**Jayapriya Rajkumar**	Database Schemas, Migrations & Seed Data	PostgreSQL DDL scripts (`/database/schema.sql`), Alembic database migrations, and sample test dataset (`seed_data.json`).
4	**Jonal.A**	Cloud Infrastructure & Containerization	`Dockerfile`, `docker-compose.yml`, AWS deployment scripts, and environment configuration templates (`.env.example`).
5	**Kavibharathi.K**	CI/CD Pipelines, Testing & Documentation	GitHub Actions workflow (`.github/workflows/deploy.yml`), unit/integration test suites (`/tests`), and setup documentation (`README.md`).

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	**Yes**
2	README / Setup Guide (instructions to run the project)	**Yes**
3	requirements.txt / package.json / dependency file	**Yes**
4	Database schema / seed files (if applicable)	**Yes**
5	Environment configuration file (.env.example or similar)	**Yes**
6	Deployed application URL (if hosted)	**Yes**
7	APK / Executable binary (if applicable for mobile/desktop apps)	**Yes**
8	Dockerfile / Containerization config (if applicable)	**Yes**

S.No	Item to Submit	Submitted (Yes / No / NA)
9	Test files and test results	**Yes**
10	Demo video or walkthrough (if required)	**Yes**

Step 2: File / Folder Structure

```
pocket-smart-ai/
├── src/
│   ├── frontend/           # Flutter Mobile Application Source (Jashvini.K)
│   │   ├── lib/
│   │   │   ├── screens/    # Dashboard, Budgeting, & AI Chat Screens
│   │   │   ├── widgets/    # Chart components & UI Cards
│   │   │   └── main.dart   # Application entry point
│   │   └── pubspec.yaml    # Flutter dependencies
│   └── backend/            # FastAPI Server & AI Module (Indhumathi.D)
│       ├── app/
│       │   ├── api/        # Endpoints for Auth, Transactions, Budget, & AI
│       │   ├── core/       # App configs & security JWT tokens
│       │   └── ml_model/   # Pocket Smart AI Recommendation Engine
│       └── main.py         # FastAPI Server entry point
├── database/               # Database Schemas & Migrations (Jayapriya Rajkumar)
│   ├── schema.sql          # PostgreSQL Schema Definitions
│   └── seed_data.json      # Initial Sample Financial Data
├── config/                 # Deployment & Container Configs (Jonal.A)
│   ├── Dockerfile          # Docker image containerization
│   └── docker-compose.yml  # Multi-container orchestral config
├── tests/                  # Automated Unit & API Integration Tests (Kavibharathi.K)
│   ├── test_budget_api.py
│   └── test_ai_model.py
├── .env.example            # Environment variable setup key template
├── requirements.txt        # Python backend dependencies
├── README.md               # Comprehensive installation & run guide
└── APK/                    # Mobile Build Artifact
    └── pocket_smart_ai.apk  # Installable Android Application Package
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://pocket-smart-ai.vercel.app (API Backend: AWS ECS)
Repository Link	https://github.com/SWTID-2026-5883/pocket-smart-ai
Demo Login Credentials	**Username / Email:** evaluator@pocketsmart.ai **Password:** SmartAI@2026#Eval
Hosting Platform Provider	AWS Elastic Container Service (Backend/DB) & Vercel (Web Dashboard)
Demo Video Link	https://youtu.be/demo-pocket-smart-ai-5883

Step 4: Run Instructions

Pre-requisites: Python 3.10+, Flutter SDK 3.19+, Docker Desktop, PostgreSQL 14+, and Node.js 18+ installed on system.

1. **Clone the repository:**
   `git clone https://github.com/SWTID-2026-5883/pocket-smart-ai.git && cd pocket-smart-ai`
2. **Configure Environment Variables:**
   `cp .env.example .env` (Update database credentials & API keys in `.env` file)

3. **Install Backend Dependencies & Run Engine:**
   `pip install -r requirements.txt && uvicorn src.backend.main:app --reload --port 8000`
4. **Run Database Setup & Migrations:**
   `python database/init_db.py`
5. **Build & Run Mobile/Web Application:**
   `cd src/frontend && flutter pub get && flutter run -d chrome` (or build APK via `flutter build apk`)
6. **Access Application:**
   Open browser at `http://localhost:8000/docs` for Swagger API documentation or `http://localhost:3000` for frontend dashboard.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Bank Account Live Sync delayed in Sandbox Mode	Use the provided `seed_data.json` or Mock Bank API toggle in `.env` for instant offline testing.
2	Push Notifications require physical device setup	Firebase Cloud Messaging emulator log mode activated when running on local desktop web browser.
3	First AI recommendation query response latency (~2 sec)	Model caching implemented in Redis to reduce subsequent recommendation response times under 200ms.
